

* REQUIRED LINKS ARE INDICATED IN RED

PRIMARY VOLTAGE SELECTION

- To select the lower primary voltage on the multi-tap transformer connect links between H1 & H3 and H2 & H4. Incoming voltage (primary voltage) to be connected to terminals H1 & H4

- To select the higher primary voltage on the multi-tap transformer connect links between H2 & H3. Incoming voltage (primary voltage) to be connected to terminals H1 & H4

SECONDARY VOLTAGE SELECTION

- To select the lower secondary voltage on the multi-tap transformer connect links between X1 & X3 and X2 & X4. Reduced voltage (secondary voltage) to be connected to terminals X1 & X4

- To select the higher secondary voltage on the multi-tap transformer connect links between X2 & X3. Reduced voltage (secondary voltage) to be connected to terminals X1 & X4
